PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in SQL, Excel, Power BI, and Python through end-to-end analytics projects. Skilled in data cleaning, exploratory data analysis, dashboard development, and transforming raw datasets into actionable business insights. Passionate about solving real-world business problems using data-driven decision making.

TECHNICAL SKILLS

Tools: Microsoft Excel

Database: SQL, PostgreSQL

Visualization: Power BI

Programming: Python

Competencies: Data Cleaning, Exploratory Data Analysis (EDA), Dashboard Design, Reporting, Statistical Analysis

EXPERIENCE

AI Intern – CodeBind Technologies

Dec 2025-Jan 2026

- Developed and tested an AI-powered chatbot using Python and Generative AI concepts, handling over 100 sample user interactions.
- Performed data preprocessing and prompt optimization on 500+ text records, improving chatbot response consistency and relevance.
- Collaborated with a team to design, test, and refine chatbot workflows, achieving 90%+ successful response accuracy across predefined test scenarios.
- Documented project workflows and presented chatbot functionality, contributing to the successful completion of the internship project.

PROJECTS

[Salary Dashboard Analysis](#)

March 2026

Excel | Data Analysis & Visualization

- Analyzed **1,000+ salary records** to identify trends across job roles, experience levels, and compensation patterns
- Cleaned and transformed raw data by handling missing values and duplicates, improving data accuracy by **~20%**
- Developed an interactive Excel dashboard using Pivot Tables, charts, and slicers, reducing manual analysis time by **~30%**
- Derived insights on **high-paying roles and salary growth trends**, improving reporting efficiency and comparison by **~25%**

Tour Revenue Analysis

April 2026

Excel | Data Cleaning, Analysis & Visualization

- Analyzed tour data of top artists to evaluate revenue, number of shows, and overall performance trends.
- Cleaned and standardized inconsistent data formats, improving data accuracy by **~20%**
- Built Pivot Table analysis to compare total revenue and revenue per show, reducing manual effort by **~25%**
- Identified high-performing tours and differences in artist efficiency based on revenue per show

[SQL Job Market Analysis](#)

PostgreSQL, Microsoft Excel | Data Cleaning, Analysis & Visualization

- Analyzed a real-world data science job postings dataset to identify salary trends, in-demand skills, and hiring patterns.
- Performed **data cleaning and preprocessing in Microsoft Excel** to improve data quality and prepare datasets for analysis.
- Built SQL queries using **JOINS, CTEs, Subqueries, Window Functions, and Aggregate Functions** to extract actionable business insights.
- Created **Excel dashboards and visualizations** using Pivot Tables, Charts, and Slicers to present key findings effectively.

ACHIEVEMENTS

Winner – Mediathon Intercollegiate Hackathon

Prize: ₹30,000

[Hospital Management System Project](#)

- Collaborated in developing a Hospital Management System by cleaning and structuring healthcare data, and creating visualizations to improve data accuracy and support informed decision-making

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY (SRMIST), TRICHY

B.Tech in Computer Science Engineering (Specialization in Big Data Analytics)

2023 – Present

CGPA – 8.00

Languages : Tamil ,English, Hindi
